PORT AUTHORITY OF NEW YORK AND NEW JERSEY BUCKSLIP

TO: N. Chanfrau
FROM: T. Cancelliere
DATE: September 9, 1993

Enclosed is a drawing which shows the proposed language for the new signs that will be installed at the siamese and wall hydrant locations (24 total) at the World Trade Center. We have selected language very carefully with the assistance of the Engineering Department based upon our in depth knowledge of the system.

Your comments are requested. Should we review with the NYCFD (my staff or yours?)
